

## CHAPTER VI

### CONCLUSION

#### 6.1. Conclusion

The Conclusion of this project is to show that Java Language can be used to code in low level process like Threads and TCP/IP socket.

This Quiz shows that actually we can create a server application that can be accessed by clients on web browser using Java language which supports Threads and TCP/IP Socket.

#### 6.2. Further Research

For the further Research, a lot of innovation and imagination can be used to develop in this application like to create some level in this quiz so that users become more challenged in playing this quiz. Also use some css and jquery to enhance the appearance of this quiz, so users can play more comfortable.
