PROJECT REPORT SIGNATURE IDENTIFICATION WITH EDGE DETECTION AND CORRELATION COEFFICIENT

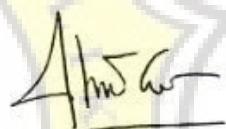

by

Harry Santoso – 13.02.0034

This project has been approved and ratified by the Faculty of Computer
Science on December 14, 2016

With approval,

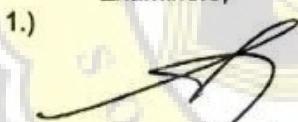

Supervisor,

Shinta Estri Wahyuningrum, S.Si, M.Cs
NPP : 058.1.2007.272

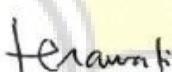

Examiners,

1.)

Suyanto Edward Antonius, Ir., M.Sc
NPP : 058.1.1992.116

2.)

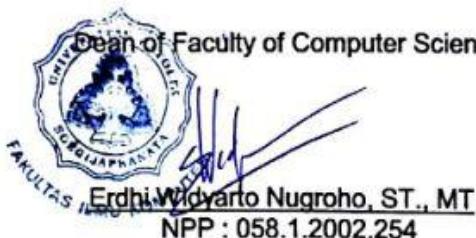

Rosita Herawati, ST., MIT
NPP : 058.1.2004.263

3.)

Hironimus Leong, S.Kom., M.Kom
NPP : 058.1.2007.273

Dean of Faculty of Computer Science,

STATEMENT OF ORIGINALITY

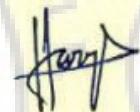

I, the undersigned:

Name : Harry Santoso

ID : 13.02.0034

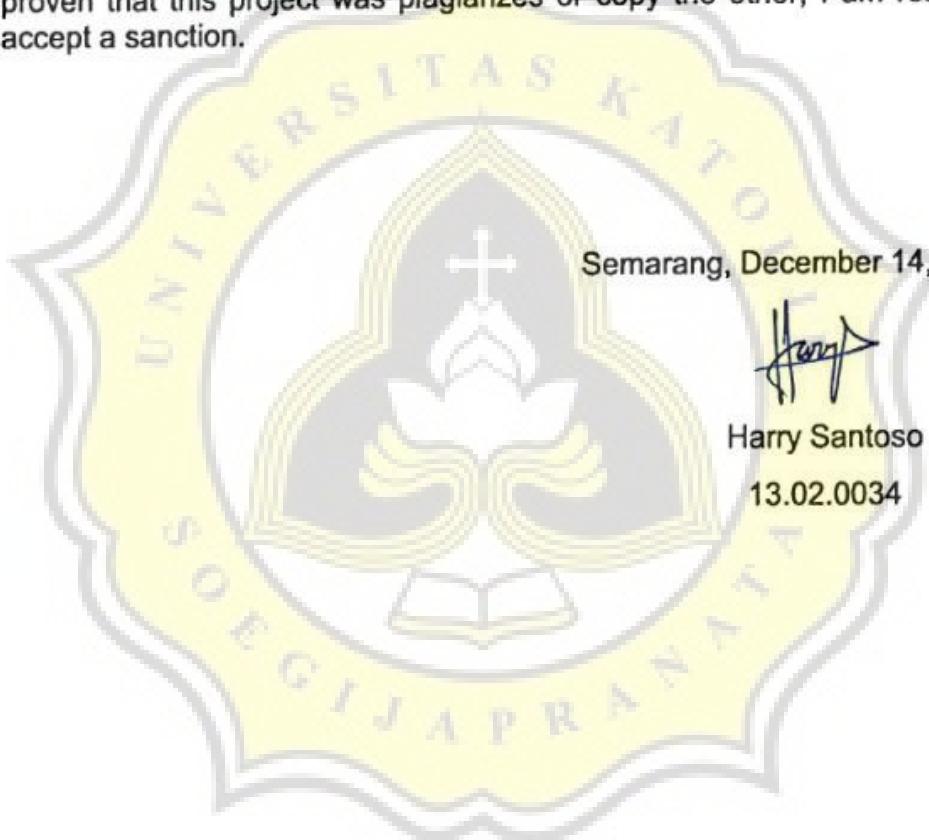

Certify that this project was made by myself and not copy or plagiarize from other people, except that in writing expressed to the other article. If it is proven that this project was plagiarizes or copy the other, I am ready to accept a sanction.

ABSTRACT

This program is created to detect the level of similarity between two signature images. The program uses correlation coefficient to determine the value of the similarity between two image signature. The signature image will be processed through two stages namely preprocessing and identification.

Preprocessing consists of grayscale, filtering, sharpening, thresholding and edge detection. This results a black and white images with signature pattern in white. The result will be compared with database images which is created by the same preprocessing. The comparation to recognize signature uses statistical correlation coefficient.

The result of signature recognition is 100% for data that is normal image, different sized and given a scratches meanwhile for signature were given rotation is 75% and signature from drawing with canvas is 80%.

Keywords : Signature Image, Edge Detection, Correlation Coefficient, Image Processing

PREFACE

This final project consists of 6 chapters. Chapter 1 describes the background of the problem, objectives and scope of the project. Chapter 2 describes the research that's been done before regard to this project and the methods used. This final project combining edge detection methods and the correlation coefficient for calculating the similarity of signature images.

The Chapter 3 of this final project describe work plan and the steps that will be done. Chapter 4 contains about analysis and design. On the design there is a use case diagram, flowchart, and class diagrams.

Chapter 5 describes implementation and testing. The implementation contains program code that has been created while in the testing contains results from the testing program. On Chapter 6 describe conclusions and further research related to this final project.

TABLE OF CONTENTS

APPROVAL AND RATIFICATION PAGE	ii
STATEMENT OF ORIGINALITY	iii
ABSTRACT	iv
PREFACE	v
CHAPTER I INTRODUCTION	1
1.1. Background	1
1.2. Scope	2
1.3. Objective	2
CHAPTER II LITERATURE STUDY	3
CHAPTER III RESEARCH METHODOLOGY	5
CHAPTER IV ANALYSIS AND DESIGN	6
4.1. Analysis	6
4.2. Design	7
4.2.1. Use Case Diagram	7
4.2.2. Flow Chart	8
4.2.3. Class Diagram	15
4.2.3.1. Preprocessing	15
4.2.3.2. Identification	17
CHAPTER V IMPLEMENTATION AND TESTING	19
5.1. Implementation	19
5.1.1. Implementation Program	19
5.1.1.1. Preprocessing	20
5.1.1.2. Resizing	21
5.1.1.3. Edge Detection	21
5.1.1.4. Correlation Coefficient	22
5.1.1.5. Tree	23
5.1.2. Program with Scan Image	24
5.1.3. Program with Draw Image	30

5.2. Testing	32
5.2.1. Testing Scan Image	32
5.2.2. Testing Draw Image	42
CHAPTER VI CONCLUSION.....	45
6.1. Conclusion	45
6.2. Further Research	46
