CHAPTER 3

RESEARCH METHODOLOGY

3.1. Research Method

In this thesis I used qualitative research which analyzes the book using feminism. I used library research in this study. Library research is a research in which the sources are acquired from the written sources such as books, magazine, newspaper, journals, and online articles (Idrus, 2009, p. 83). I used a book about travel writing which was written by Indonesian women. Below were the details of the primary source of this thesis:

Type/Genre : Anthology
Title : The Naked Traveler Anthology
Author : Trinity
Publisher : PT. Bentang Pustaka
Year of Publish : 2014
City : Yogyakarta
Page : 226 pages

3.2. Research Procedure

To make a good research, I followed several steps. First, I read the book *The Naked Traveler Anthology* (2014) which was the main source. Second, I made list of the experiences and the challenges they experienced
when they were traveling from the book that I used. Third, I analyzed the list using feminism approach. Last, I made the conclusion from the data which I collected.

3.3. Data Analysis

In this thesis, I analyzed the book using feminism approach. As I cited in the review of literature, men always wrote about women in men’s perspective. Also, Showalter’s cultural model; “social contexts, acknowledging class, racial, national, and historical differences and determinants among women” (Guerin, Labor, Morgan, Reesman, & Willingham, 2005) guided me to analyze the experiences and challenges they faced during their travel written in *the Naked Traveler Anthology* (2014). Therefore, I used feminism approach as I considered the approach was the best to analyze women’s stories written by women.
