ABSTRACT

This program has a function for helping a patient find the nearest hospital. With this program, the writer hopes that this program can help patients in emergency conditions. In this program, there is an account of the existing hospital in Indonesia. In addition to the information already contained in these websites, visitors can also find the hospital that they wanted. In addition, there are also features a map to help patients find the nearest road to get to the hospital. In addition, there is a menu found that can help locate where you are now. Thus the great hope of the author that this program can help people around.
FOREWORD

First of all I want say thanks to God for this project. I can complete this program with title:

Hospital search using google api.

I in process complete program many people support and writer would thanks to:

- My parents, Herry Susanto and Nelly Gunawati and my sister Inge Rinanda Anggia, and my brother Irawan Faisal Santoso for their support, love, and pray.
- Odelia Sabrina kurniawan for their support, love and pray.
- Roy edbert, Yohanaes trianto, many more for support to finish this project.
- All lecturers in Faculty of Computer Science.
- IKOM SOEGIJAPRANATA CATHOLIC UNIVERSITY.

Finally, writer hope this program useful to many people.
