CHAPTER 6
CONCLUSION

6.1 Conclusion

This final project provides information on tourism that is closest to our current location with ratings of 3 to 5 star. The program uses the data from the Google Maps API catered in Semarang. Tourism data based on data in Semarang tourism so that people could find places of tourism with moderate to high ratings.

From the data obtained in the Tourism Agency concluded that by using the Google Maps API makes it easy for people to find nearby attractions with knowing radius, moderate to high rating and direction toward tourist sites.

6.2 Suggestion

For the development of the project is expected to further so that more detail e.g. reviews of existing amenities attractions and provides interesting images.
