ABSTRACT

This time the company sells plastics and sheets it from company to department stores that makes the price is more expensive than if it sells to the customer directly.

This project makes an android online shop application to sell products to customer directly. This project creates a list of customers and sales which can be used for company stocks planning. This project also creates a shortest route for sending products to customer.

For the future development, this project can create a purchase orders, a lot of feature to make it easier for customers and give a notice to the customer that the orders have been sended.

Keyword: Android Application , Mobile Application , Online Shop , Google Map , Firebase.

PREFACE

The preface explains the whole core of chapters 1-6

- Chapter I tells how important it is to keep the competition to increase product sales.
- Chapter II tells about the differences about this project and other android online store applications.
- Chapter III tells about how readers create programs like this project.
- Chapter IV tells about the analysis of this project and the flowchart to complete this project.
- Chapter V tells about a main code from this project and this app is processing a screenshot image.
- Chapter VI tells about the conclusions of this project and the development of this project.
