APPROVAL AND RATIFICATION PAGE

PROJECT REPORT

Developent of Operating System for Web Server

This project report has been approved and ratified by the Dean of faculty of Computer Science and Supervisor on July 26th 2013

With Approval,

Examiners,

Rosita Herawati, ST., MIT
NPP : 058.1.2004.263

Supervisor,

Hironimus Leong, S.Kom., M.Kom
NPP : 058.1.2007.273

Examiners,

Shinta Estri Wahyuningrum, S.Si
NPP : 058.1.2007.272

Examiners,

R. Setiawan Aji Nugroho, ST., McompIT
NPP : 058.1.2004.264

Examiners,

Suyanto E.A. Ir. M.Sc
NPP : 058.1.1992.116

Dean of Faculty of Computer Science,

Hironimus Leong, S.Kom., M.Kom
NPP : 058.1.2007.273

STATEMENT OF ORIGINALITY

Here by signed,

Name : William Sampoerna

ID : 09.02.0009

Certify that this project was made by myself and not copy or plagiarizes from other people, except that in writing expressed to the other article. If it is proven that this project was plagiarizes or copy the other, I am ready to accept a sanction.

FOREWORD

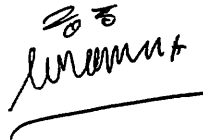

Thanks to God for the bless, I have been completed this project with title:
Developing ubuntu of web server.

In this opportunity, writer would thanks to:

1. My parents, Ignatius for their support, love, and pray.
2. Hironimus Leong.S.Kom,M.kom. as my supervisor, for his advice, and ideas that inspired me.
3. All lecturers in Faculty of Computer Science.
4. All my best Friend in ikom and many more for support to finish this project. We are best friend forever.
5. IKOM SOEGIJAPRANATA CHATOLIC UNIVERSITY.

Finally, writer apologizes because this project is not perfect, Hopefully This project may be useful for everyone

ABSTRACT

Linux is widely used by the public either by software developers (developers) or regular users. The need for linux operating system that is easy to use and has user friendly interface that encourages more people to do remastering Linux.

Remastering generally divided into four sections, namely: downloading source code, installation of operating systems, modifications (remastering) and then create an ISO file from souce code for instalation. Given the remastering of this distro, I hope more and more users are using Linux to avoid software piracy, because Linux is free.

Web Server is a server software that functions accept HTTP or HTTPS requests from clients, known as a web browser and sends the results back in the form of web pages are generally in the form of HTML documents. One of the popular web server on Linux is Apache. Apache is a cross-platform web server that can run on multiple platforms such as linux and windows. Web Server is a computer that provides services to the internet. Servers also called the host. So that you can put your web design into the net, then you should have a room in advance in the internet, and this room is provided by the server. That is called the Web Server.

Keyword : Linux Operating System, Remastering Linux ,Web Server
