ABSTRACT

The operating system is one of the important attributes in the computer world. With the operating system, the computer can easily be used or run. The operating system can be called as media liaison between the user and the computer. Not only that, every computer will be more perfect if equipped with an internet connection that useful for connecting all computer there is throughout the world.

The development of internet technology is one advances that has provided a major influence in human life. It could be said, most of the people there are in the world using the internet network to perform an interaction or activities in the virtual world. And now, the technology of the internet can also be accessed easily just by using the mobile phone.

In its development, many media are developed with the existence of internet technology, one of them is social network. Social network is a medium that connects computer users which are all over the world. In this era, all activities whether related with the people are already known or not yet known can be easily accessed through the medium of social network.

So, from the above summary, an idea appear to develop an operating system to be a new operating system, which operating systems are used for social network application development, that of course requires an internet connection to run it.

FOREWORD

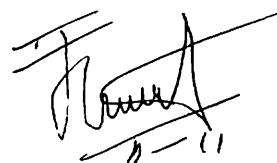

Praise be to God for all His blessings, the author finally was able to complete the project, that entitled "Operating System Development on Social Networks".

In drawing up this project, not the least of the difficulties and obstacles encountered, but thanks to the support and encouragement of the people closest, the author was able to finish it. Therefore, on this occasion the author thanked profusely to:

1. Ali Cahyadi as uncle and at once as father, mother, brothers and sisters and all the beloved family. above all prayer and financial support to complete this project.
2. My friends who giving spirit and motivation for the author to complete this project. And also special to Dio gabriel Cahyadi, eco mike and vincensius.
3. Special for my brothers and sister. Paskalis hermawan. Rexy tri asa. and Monika seles because it has been faithfully give a passion and drive for the writer to complete the project.

The author is aware that there are still many shortcomings in this project. Therefore all criticism and suggestions that build will authors receive well. Hopefully the project "IkomBuntu Operating System for Social Network" benefit us all.
