CHAPTER 6
CONCLUSION

The conclusion of this project are:

1. Installing nginx web server with RTMP module support. Configuration need to be done to maximally run the server.

2. Install obs by using operating system ubuntu 14.04 and configure ip addresses that will be hooked up with a streaming server.

3. The announcement video can be played in a live streaming by entering the ip-address on the web browser. The video streaming can be accessed on smart TV, PC, and smartphone web browsers.

As a suggestion, the next researcher can add other information on the outside of the video, which can be text or realtime images. The information can be campus activities, college schedules, and payment information.
