

BAB VI

RENCANA ANGGARAN BIAYA

6.1 Rencana Anggaran Biaya

Rencana anggaran biaya konstruksi ini menjelaskan mengenai perhitungan yang mencakup untuk harga satuan pekerjaan. Harga satuan pekerjaan ini berdasarkan HSPK SNI 2017 sumber data dari Pasaran Bebas Daerah Kota Semarang dan sekitarnya.

Analisa biaya konstruksi ini meliputi data harga satuan upah, barang alat, maupun material. Harga satuan pekerjaan (HSP) dilakukan perhitungan volume dari setiap pekerjaan konstruksi, seperti menghitung volume dari setiap pekerjaan dari penyiapan lahan kerja, struktur bawah, maupun struktur atas.

Rekap adalah hasil total dari perhitungan biaya berdasarkan volume pekerjaan. dengan memperhitungkan biaya-biaya administrasi lainnya. Rekap kemudian dapat dibuat kurva S yang berfungsi sebagai jadwal pekerjaan serta mengatur pengeluaran keuangan selama pekerjaan konstruksi berlangsung. Biaya konstruksi merupakan suatu cara perhitungan harga satuan pekerjaan konstruksi yang dijabarkan dalam perkalian indeks bahan bangunan dan upah kerja dengan harga bahan bangunan dan standar pengupahan pekerja untuk menyelesaikan per satuan pekerjaan konstruksi.
