

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

Based on the study the writer has conducted, there are several things related to word formation of *kerata basa* that can be concluded. Through this analysis, *kerata basa* only applies type of blending formation process in forming *kerata basa* term. There are 5 main patterns of blending category and pattern A is the most dominant pattern to create and represent *kerata basa* term, particularly pattern A4 (blending formation is formed by the middle syllable of the first word + the last syllable of the second word). Through *kerata basa*, it shows that blending formation in *kerata basa* is more complex because *kerata basa* can be formed by more than 2 words. In addition, blending in *kerata basa* is also different with blending in general since *kerata basa* words are not used in daily conversation and it is created by 'othak-athik gathuk' principle (interpretation and exegesis from Javanese society). However, the existence wordplay of *kerata basa* in Javanese society contains of uniqueness and creativity of the user in creating *kerata basa* term as the Javanese folk etymology.

5.2. Suggestion

The writer hopes that this study can help other students who are interested with the study of word formation process especially in Javanese language. Nevertheless, the writer realized that this study has some limitations. Therefore, the writer is going to give a suggestion for further research related to word formation process analysis. She hopes that future researcher can also investigate Javanese word formation process in Javanese textbook literature.
