

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

5.1 Conclusion

Based in the discussion on the previous chapter, there are some conclusions that can be drawn:

1. The education background for the parents in FLA; many of them come from bachelor, but in FLA there are parents who have low education background because the parents are graduate from elementary school.
2. For the language use; from the 53 participants 94,4% feeling comfort to communicate using Javanese language. Most of them used Javanese lanaguage for the daily life conversation with their family. this is indicate that actually parents effort to maintain Javanese language to their children.
3. For the life style;the 53 participants are still maintaining the culture of Javanese from the aspect relating to Javanese culture. Parents help the children to maintain the Javanese language by maintaining the Javanese culture. 92,5% participants have effort to encourage their children to know more about Javanese story.Most of them think that they can maintain Javanese language with giving some books or other ways that ca make their chidren understand about Javanese language.
4. Identity;the 53 participants are still maintaining their Javanese culture in their life. Because from the data obtained96,6% parents have effort to

encourages their children to speak Javanese. Most of the Participants aware that identity for Javanese people is Javanese language.

5.2 Suggestion

Based from the research, the writer would like to give some suggestion about this topic. They are as follows:

1. The parents should not only use Bahasa or other language but should maintain the use of Javanese language. By doing so, it will make the children familiar with Javanese language.
2. The Javanese language that is always used in the daily communication are still to be maintained. Maintaining the use of Javanese language by always using it in the daily conversation will help to maintain the language much better than just teaching it by theories.
3. Javanese language are to be used as an identity of family in the Javanese culture. The other people will know someone is Javanese by listening the Javanese language spoken by someone. So if Javanese people can maintain the culture and speaks Javanese language, they will show their identity to other people.
