

CHAPTER VI

CONCLUSION AND FURTHER RESEARCH

6.1. Conclusion

In doing this final project also found several obstacles including the specification of the computer that author use as a server therefore less qualified after login PHPVirtualbox with long time problems arise dissolution connection Virtualbox.

But in addition to these obstacles the authors also gain some knowledge that the author has never been put into practice in daily life the use of the Operating System in the Operating System that is based on not with GUI. Then the authors also be understood to use phpvirtualbox on the server computer with the specs should be enough, especially on memory ram.

6.2. Further Research

In using two applications namely PHPVirtualbox Webmin and there are some things that should convey the author, is:

1. Existence using Webmin and PHPVirtualbox training for people who will work at the company as an IT Admin.
2. Requires that all servers are within specifications have Webmin and PHPVirtualbox
