## **FOREWORD**

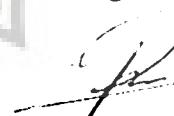

I dedicated this graduation to my whole family that had been support me. Thanks to God that always give me inspiration and solution if I had trouble.

I would like to say thank you to:

1. God for His guide, so I can finish my Bachelor study.
2. My family that always supports me and fulfill my need.
3. Rosita Herawati ST., MIT as supervisor that give me ideas and advices to finish my project perfectly.
4. All Lecturers Faculty of Computer Science.
5. At last big thanks to all of my project friends. Also thanks to my friends who always support me.

Thank you to anybody who know me and always pray and support for me. I apologize if I had mistake and do something wrong and caused you mad and angry.

## **ABSTRACT**

In this application made a program that will reply a sms automatically. This application server can receive and sending sms from any number for which the users must register. But users must type a keyword "HELP" to receive an keyword for see menu and order food. Gammu here acted as a tool for here manage the sending and receiving sms. Gammu is not a finished application, but he is module that can be combined with any programming language. For example can use PHP and the access it through a database administration such as phpMyAdmin.

Keyword : gammu, PHP
