

CHAPTER VI

Conclusion and Further Research

6.1. Conclusion

Based on the testing and the result then the writer gets some conclusions as follows:

- This Program's response is based on the OS and the hardware's quality.
- This Program's scoring function is flawed due to the limitation of the assembly language.

6.2. Further Research

- Correct the scores.
- Add rotation to the tetra.
- Make it more responsive using higher language.
- By improving this program using higher level language this program should work flawlessly.
