ABSTRACT

Indonesia is a country that has rich tourist attractions, so it has a lot of attractions that need to be addressed but not all of the attractions in the known by everyone. With not many people know where a good place for tourism, so many sights not on the visit.

With its many tourist attractions which is unknown, then use the application on the computer searching can much easier in finding a spot where tourism would be seen. And knowing the place where belom never know with knowing the address, facilities and definitions will be able to better understand its tourism place. tourism is not a lot of places on the visit.

The result of all the programs that are working on producing an application which can make in the search for a place for tourism and to know the addresses that you want to know. So there is no need to use the Internet in search of the places that you want to know.

Keyword: tourism data, C programming language
FOREWORD

Praise and thanks to Allah swt, always give grace in making this project, with program called TOURIS DESTINATIONS APPLICATION USING C has been completed in working on. The project and this report cannot be completed without the help of many people. So, in this occasion, thanked all the lecturers who gave the eyes during a lecture, Professor of learning mentors who have guided the project until completion, parents who have helped many prayers, support and friends who have a lot of support, know ledge so the project can be completed. Finally, i want to apologize if i make a mistake in complete projects and writing this report
