

CHAPTER VI

Conclusion and Further Research

6.1 Conclusion

This project uses the C programming language and the structure of the data hash table contains a list of links and the sequential search algorithm that succeed the programming from the menu, input the data, display data, showing hash tabel, search by name and category. And the program can ease searches places in a computer.

6.2 Further Research

This project could be developed more bigger by adding more menu, create a txt is shorter and makes the auto doesn't need to load halman one by one
