## **ABSTRACT**

Android has been give great influence into social life, and now lots of social activities involved android as the important part of human being . Android already improved a lots of aspect of human needs. Writer look the important thing to being success is have a lots of relative and have a great connection to develop ourself. One of the important things for human being to get a relative is remembering our relative's birthday.

Therefore the writer makes application Birthday Reminder to remind the user. The user only need to enter the simple data of the user contact like name, phone number and friend's birthday. Automatically this application is able to deliver our birthday wish based on user contact information.

This application will bring your success one step closer, begin from your phone contact.

*"If you care at all, you'll get some results. If you care enough, you'll get incredible results."*

- Jim Rohn -

**Keyword : Birthday Reminder, Android Application.**
