

CHAPTER VI

Conclusion and Further Research

6.1 Conclusion

Based on the results of the application testing results it can be concluded as follows :

1. This application has been completed and can be a birthday reminder for Android smartphone users.
2. Automatically this application is able to deliver birthday wish with contact's information.
3. This application has successfully made user have a good relationship after using this app.

6.2 Further Research

From the results of research by the author, this application still not perfect. GUI of the application is not flexible for all types of Android smartphones. This application will make Android smartphone batteries become depleted faster.

The author hopes that this application can be developed more sophisticated. Settings Can be complemented with features, so users can take part in organizing birthday reminder application. These applications can also be developed to send messages via many social networking
