

## **CHAPTER VI**

### **CONCLUSION**

#### **6.1 Conclusion**

The program can draw any shapes by drawing the path lines from one point to another according to the input. The program can draw the color of rectangle and right-angled triangle with certain condition. Implement the html5 technology to display the input, draw the shapes, coloring the shapes and display the output.

#### **6.2 Further Research**

1. This project is simple and need further development.
2. In further development, another shapes can be make, not only right-angled triangle and rectangle shapes.
3. Also this project is possible to develop as simple drawing tools application on browser.
