

CHAPTER III

PLANNING

3.1 Research Methodologies

The project was completed after going through several stages,
they are:

- 1. Finding and collecting references to help complete this project.
- 2. Analyze the problem and create a good planning for building this
project , including the algorithm and data struct.
- 3. Implements data struct and algorithms mentioned.
- 4. Test all the function in this project

3.2 Project Management

The project was done for 4 months, which will be divided into several step
as below:

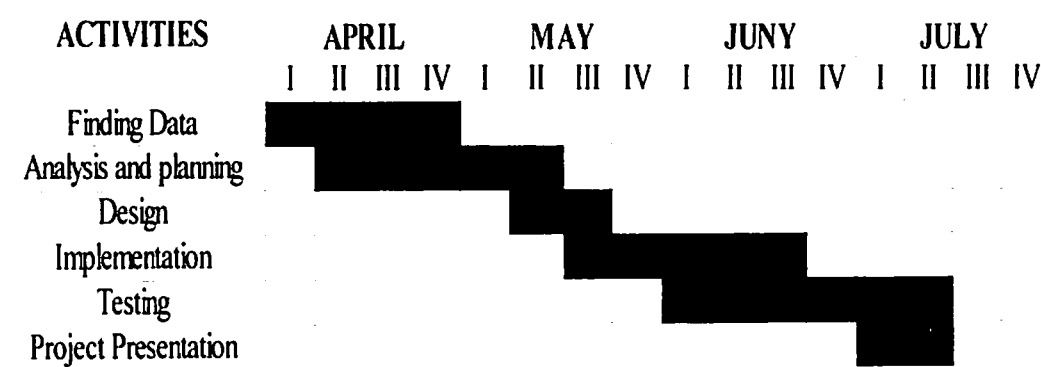

Figure 3.2 Project Management
