

## **CHAPTER VI**

### **Conclusion and Further Research**

#### **6.1 Conclusion**

This application can provide entertainment when bored or more relaxed. each player gets three cards at random, after which the player directly calculate the value of the card in the can if the value on the card which can be less than the limits specified miniman value card in the player required to take the drinks to a minimum limit of the value of the card

#### **6.2 Further Research**

This application is simple and needs much further development. This application can compile C, for further application can compile the program over again instead of just C. In further developments, applications created with the gui look nicer, so look like play using playing cards in original. Enemies in this application is also expected to be more difficult in the presence of a comparison between the value of the card by adding the card until the value reaches the target.
