CHAPTER VI
CONCLUSION AND FURTHER RESEARCH

6.1 Conclusion

In conclusion the authors managed to create a CAPTCHA image with a different random each letter. And it makes the computer will be more difficult to solve and prevent spam entry into the web page.

6.2 Further Research

The CAPTCHA still has drawbacks, namely the color of the print is not so obvious that the user will be difficult to read. The writer hopes that in the next study these issues can be fixed, so the CAPTCHA will be better.
