PROJECT REPORT

SIMULATION ALGORITHM APRIORI USING HTML5

by

10.02.0046 – ANDRI HASMORO

This project report has been approved and ratified by the Dean of Faculty of Computer Science and Supervisor on 18 July 2014

With approval,

Examiners,

Suyanto Edward Antopius, Jr., M.Sc
NPP : 058.1.1992.116

Supervisor,

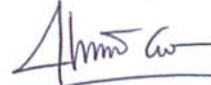

Hironimus Leong, S.Kom., M.Kom
NPP : 058.1.2007.273

Examiners,

Rosita Herawati, ST., MIT
NPP : 058.1.2004.263

Examiners,

Shinta Estri Wahyuningrum, S.Si, M.Cs
NPP : 058.1.2007.272

Dean of Faculty of Computer Science,

Hironimus Leong, S.Kom., M.Kom
NPP : 058.1.2007.273

STATEMENT OF ORIGINALITY

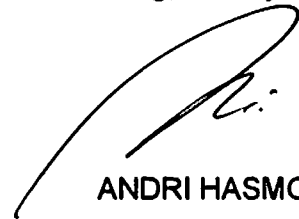

I, the undersigned:

Name : ANDRI HASMORO

ID : 10.02.0046

Certify that this project was made by myself and not copy or plagiarize from other people, except that in writing expressed to the other article. If it is proven that this project was plagiarizes or copy the other, I am ready to accept a sanction.

Semarang, 18 July 2014

A handwritten signature in black ink, appearing to be 'Andri', written in a cursive style.

ABSTRACT

Promotions and will further facilitate the placement items in the new offer and prodak shall preclude people will have difficulty in finding items or information.

But it still hurts a lot in making placement or promote items are not purchased frequently. So the seller is difficult to find a way out of this problem.

This application uses apriori algorithm calculation that can determine the item that often arises is bounded with minimal support. So the results of frequency calculations can facilitate the placement of a seller item and offering new item. In order to facilitate the buyers in search item.

The project was created using Apriori Algorithm with HTML5 programming language and JQuery programming language. With an attractive interface and easy process then this application will make it easier to use.

Keyword : HTML5 , jquert language, Apriori Algorithm

FOREWORD

I am very happy and did not expect, I can finish my final project with title : Simulation Algoritm Apriori Using HTML5. I couldn't finish this project and report without help from God has provided health, patience and ease in making this project, my parents and lecturers are always advised, pray, support, and encouragement until I graduated. And then my friends and my girlfriend who have helped me and always makes me laugh when I am stressed and tired.

Lasr, writer want to apologize if wrter have a mistake, also critics and suggestions are expected this project.
