

CHAPTER VI

Conclusion and Further Research

6.1 Conclusion

This application can solve the problem if we want to predict or know the details of our data and nominal dollars will we pay after we see the details of the data and the nominal predicted to last several days.

6.2 Further Research

This application can be modified by adding the type of industrial electrical and pieces discounts as PLN program currently being conducted by the government. In addition we can also add the application form to enter the data from the data directly into php txt so consumers do not need to change the data in the txt file manually.
