to me, arda.aldoe00, ilkom.ramadiani, lala.s.riza, andri.pranolo.id

We would like to acknowledge you that we have received your final manuscript which was submitted on August 7, 2016. However we still found some recommended improvement, namely:

Reviewer 1:

-

Reviewer 2:

-

Notes from the template editor:

Please refer to the IEEE Manuscript Template for Conference Proceeding:

1. Please do not use superscript numbering on the author name and affiliation
2. The citation sequence should be re-arranged, example: [8] [9] should be cited before [10]
3. Please remove [19] from the references section, because it is never cited
4. The content of Table II, III, IV, and V should be separated into two or more tables
5. When a table is broken down, the header and caption should be rewritten in all pieces of table (Table VII)
6. Use IEEE heading style for section title (Acknowledgement, References)

Notes from the proofread editor:

-
- The sentence "The findings shown that adolescent had.." in abstract is a complex sentence, please consider to simplify.
 - "Fifty four" and "sixty six" are better written using dash sign, i.e. fifty-four.
 - There are some repetitive words in the paragraph, such as adolescence, male, group, and etc.
 - "entertainment oriented" are better written using dash sign.

- please consider to use proofreading tools to revise your paper.

We will really appreciate if you can finish them by September 30, 2016.

If in any case you do not wish to do the recommended improvement from the reviewers, please inform us the background

reason.

We apologize that we may not accept and submit papers for inclusion to IEEE XPLORE, that are not updated with recommended improvements from reviewers and or editors.

Thank you.

Regards,
The Technical program chairs
