

CHAPTER V

CONCLUSION AND SUGGESTIONS

5.1 Conclusion

The aim of this research is to find out one research question that is about the kinds of motivation that students at the *Englishpreneurship* and English Literature programs at Soegijapranata Catholic University have.

The overall results, *Englishpreneurship* and English Literature students were in high level of integrative motivation. They were highly motivated to learn English because they were interested in the people and culture represented by the target language group. In addition, *Englishpreneurship* and English Literature students were in moderate level of instrumental motivation. They were in moderate level to learn English for some functional reasons like to pass an exam or to get better jobs.

The researcher found that in learning English, *Englishpreneurship* and English Literature students had integrative motivation. Students in both of these programs were highly motivated in integrative motivation. But, the writer found that *Englishpreneurship* program students had higher instrumental motivation in learning English and English Literature students had higher integrative motivation in learning English.

There were many reasons for them to learn English, such as English is a useful language that they can use for their future jobs and careers. Learning English can able them to get better jobs.

5.2 Suggestion

This research is far from perfect because of the limitation of the writer in collecting the data. It would be better if the next researchers could get more information about their reasons in learning English. The writer suggests that the next researcher can apply mixed method for their research so the data will be more valid. The next researcher can interview more students to get more comparative information between English Literature and *Englishpreneurship* students. Next researchers need to prepare their questions and make sure that the respondents understand the statements. Because if they do not understand, the respondents can give wrong responses, and we cannot get the information that we need.
