CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

By referring to the analysis in chapter four, the writer found there are 72 words considered as jargons used in *togel* gambling.

After classifying the jargon words, the writer analyzed by explain the meaning of each jargon. The writer found 72 jargon words in *togel* gambling. After that, the writer analyzed them morphologically to see how they are formed. From 72 jargon words the writer found that there are 46 jargon words (64%) with one process, then 2 jargon words (3%) with two processes, 3 jargon words (4%) with other processes and then 21 jargon words (29%) with no process. Thus, we can conclude that jargon word with two processes is the least dominant one, and then followed by jargon words with no process, and the most dominant one is jargon word with one process.

5.2. Suggestion

The writer hopes that the readers will continue the analysis of jargon words used in *togel* gambling because the writer assumes that there are many other sides from jargon words used in *togel* gambling in Indonesia exactly in Ampel and Tengaran areas that can be analyzed. In this research the writer analyzed about the jargon words used in *togel*

gambling in general, by referring to this research the writer hopes that

there will be the readers who will analyze further about the jargons used I

togel gambling.
