

## CHAPTER 5

### CONCLUSION AND SUGGESTIONS

#### 5.1 Conclusion

This research aims to find out students' and teacher's opinions on the writer's product (workbook) in SDI Al-Azhar 14 Semarang using questionnaire as the quantitative method major instrument and interview to support the quantitative findings. The data from the questionnaire shows all the mean scores are above 3 which can be indicated as a positive response for the writer used score 4 for the 'Strongly Agree' option. The result of the interview with the English teacher is also concluded as a positive response since she said that the writer's product is good enough to be used at the school for the students to practice more. It means that the writer's product can be used in the learning process to find out students' strengths and weaknesses.

#### 5.2 Suggestion

The writer suggests further researchers to ask another expert to judge and validate the product since the writer only had 1 teacher and 1 lecturer to do so. Further researchers is also suggested to test the product with more respondents in order to get more reliable data. For the writer's product is workbook which is a part of formative tests, further researcher can also make a summative test version to support it.
