INFORMED CONSENT

INFORMED CONSENT FORM

This informed consent form is for refugees under International Office of Migrations (IOM) and who we are inviting to participate in research about happiness and well-being, titled 'Happiness on Immigrant Refugees'.

This research is held by Christisia Natalia Agnes Abadi, from Soegijapranata Catholic University

This informed consent form has two parts:

- Information Sheet (to share information about the study with you)
 - Certificate of Consent (for signatures if you choose to participate)
- You will be given a copy of the full Informed Consent Form.

Part I: Information Sheet

I am Agnes, a psychology student from Soegijapranata Catholic University. I am doing research on the happiness on refugee people in Semarang. I am going to give you information and invite you to be part of this research. You do not have to decide today whether or not will you participate in this research. Before you decide, you can talk to anyone you feel comfortable with about this research.

This consent form may contain words that you don't understand. Please ask me to stop as we go through the information and I will take time to explain. If you have questions later, you can ask them of me.

Everyone seeks for happiness in their life. Happiness is also matter for refugees. So, I want to find happiness on refugee's self. I believe that you can help me by telling about your activity and self in general. I want to learn about the different ways that refugees see their own happiness, and how refugees try to make their self-happy.

This research will involve your participation in an interview that will take about one hour, and a few hours observation.

You are being invited to take in this research because we feel that your experience as a refugee can contribute much to our understanding and knowledge of happiness that you have.

Your participation in this research is entirely voluntary. It is your choice whether to participate or not. If you choose not to participate all the services you receive will continue and nothing will change.

I am asking you to help me learn about happiness in your community. I am inviting you to take part in this research project. If you accept, you will be asked to participate in an interview with myself.

During the interview, I will sit down with you in a comfortable place. If it is better for you, the interview can take place in your room. If you do not wish to answer any of the questions during the interview, you may say so and the interviewer will move on to the next question. No one else but the interviewer will be present unless you would like someone else to be here. The information recorded is confidential, and no one else except me will access to the information documented during your interview. The entire interview will be tape-recorded, but no-one will be identified by name on the tape. The information recorded is confidential, and no one else except me will have access to the tapes.

The research takes place over one month in total. During that time, we will visit you two or three times for interviewing you at one-month interval and each interview will last for about one hour each.

If the discussion is on sensitive and personal issues e.g. traumatic experience etc. then an example of text could be something like "We are asking you to share with us some very personal and confidential information, and you may feel uncomfortable talking about some of the topics. You do not have to answer any question or take part in the interview if you don't wish to do so, and that is also fine. You do not have to give us any reason for not responding to any question, or for refusing to take part in the interview". In this discussion we also keep doing Covid-19 protocol to maintain our health.

There will be no direct benefit to you, but your participant is likely to help us find out more about happiness that refugees have.

We will not be sharing information about you to anyone outside of the research team. The information that we collect from this research project will be kept private. Any information about you will have a number on it instead of your name. Only the researchers will know what your number is and we will lock that information up with a lock and key. It will not be shared with or given to anyone except the research team.

Nothing that you tell me today will be shared with anybody outside the research team, and nothing will be attributed to you by name. The knowledge that I get from this research will be shared with you and your community before it is made widely available to the public. We will publish the results so that other interested people may learn from the research.

You do not have to take part in this research if you do not wish to do so, and choosing to participate will not affect your life in any way. You may stop participating in the interview at any time that you wish without your life being affected. I will give you an opportunity at the end of the interview to review my remarks, and you can ask to modify or remove portions of those, if you do not agree with my notes or if I did not understand you correctly.

If you have any questions, you can ask now or later. If you wish to ask questions later, you may contact any of the following Agnes, cragnes@yahoo.com, 085761826806.

Part II: Certificate of Consent

BAB 1 PENDAHULUAN Latar Belakang Masalah Semua orang mencari kebahagiaan, suatu hal yang tidak bisa dipungkiri (Pascal dalam Sirgy, 2012). Tuturan Pascal ini didasari oleh kenyataan hidup manusia di sekitarnya. Pascal yang seorang filosof itu melihat bahwa manusia berusaha untuk memenuhi tujuan hidupnya. Tujuan hidup itu bermacam-macam, mulai dari terpenuhinya kebutuhan hidup sehari-hari, mencapai cita-citanya, menjadi kaya, menjadi orang yang berguna bagi yang lain, dan sebagainya. Ada begitu banyak tujuan hidup manusia. Penggambaran di atas hanyalah sebagian kecil dari banyaknya tujuan hidup itu. Pascal melihatnya sebagai kebahagiaan yang dicari setiap manusia di dunia. Sayangnya tidak semua manusia menyadari bahwa mereka mencari kebahagiaan. Kebahagiaan menjadi hal yang sangat filosofis namun tetap diusahakan setiap manusia. Mulai dari orang dengan masa lalu yang hidup dalam hiruk pikuk perang maupun mereka yang hidup dalam keadaan damai. Semua mengejar kebahagiaan. Hanya saja kebahagiaan itu diusahakan melalui berbagai tujuan hidup mereka. Orang yang hidup pada masa perang memiliki tujuan hidup damai tenram, bisa hidup aman dan nyaman. Ini dapat dinyatakan sebagai kebahagiaan bagi mereka. Orang yang hidup dalam kekurangan ingin agar hidup berkecukupan. Ketika mereka sudah berkecukupan ada kebahagiaan yang
