## DECLARATION OF AUTHORSHIP

I, the undersigned:

Name : GABRIEL VALENT FEBRYAN SANTOSO

ID : 15.K1.0056

declare that this work, titled "AUTOMATIC WATERING LEEKS FARM IN A MINI GREENHOUSE USING FUZZY LOGIC", and the work presented in it is my own. I confirm that:

1. This work was done wholly or mainly while in candidature for a research degree at Soegijapranata Catholic University
2. Where any part of this thesis has previously been submitted for a degree or any other qualification at this University or any other institution, this has been clearly stated.
3. Where I have consulted the published work of others, this is always clearly attributed.
4. Where I have quoted from the work of others, the source is always given.
5. Except for such quotations, this work is entirely my own work.
6. I have acknowledged all main sources of help.
7. Where the work is based on work done by myself jointly with others, I have made clear exactly what was done by others and what I have contributed myself.

## STATEMENT OF SCIENTIFIC WORK PUBLICATION FOR ACADEMIC INTEREST

I, the undersigned:

Name : GABRIEL VALENT FEBRYAN SANTOSO

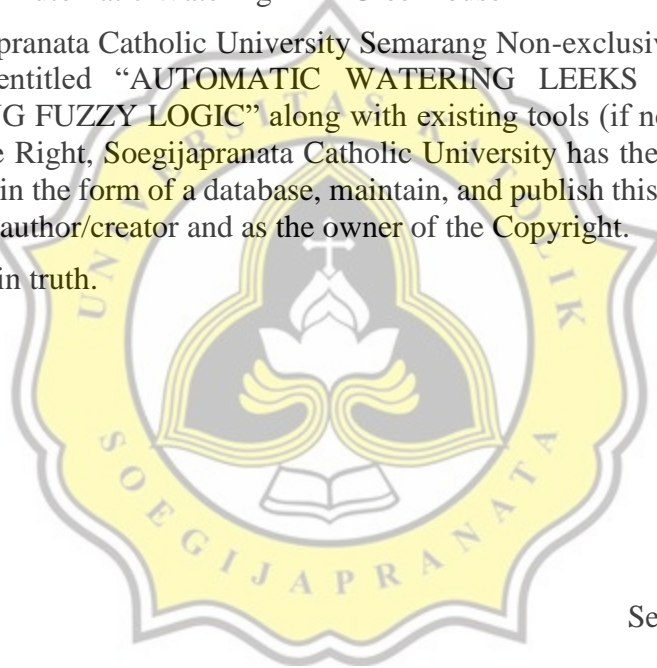

Program : Informatics Engineering

Faculty : Computer Science

Type of Work : Automatic Watering Mini Greenhouse

Agree to grant Soegijapranata Catholic University Semarang Non-exclusive Royalty-Free Rights for scientific work entitled “AUTOMATIC WATERING LEEKS FARM IN A MINI GREENHOUSE USING FUZZY LOGIC” along with existing tools (if needed). With this Non-exclusive Royalty-Free Right, Soegijapranata Catholic University has the right to store, transfer media/format, manage in the form of a database, maintain, and publish this final project as long as I keep my name as the author/creator and as the owner of the Copyright.

This statement I made in truth.

## ABSTRACT

*One of the biggest problems in the 21st century in urban areas is consumerism. We are encouraged to buy all our daily necessities instead of trying to produce or grow our own food. We are very dependent on traditional markets and supermarkets to meet our daily needs. Lack of soil and busyness are also some of the problems we face in urban areas. Some people who want to try to grow their own food sometimes fail because of erratic busyness, as a result, the plants that they cultivate are not taken care of and they wither and die.*

*The solution I want to offer is a mini greenhouse that is equipped with Soil Moisture, Temperature, Light sensors and can give notifications to the user when the plants have been watered. To make a greenhouse-like this I use Arduino Mega2560 R3 with ESP8266 and the algorithm I will use is Fuzzy Logic using Sugeno FIS.*

*The final result I hope for from this project is a device that can irrigate plants in a mini greenhouse which in this case contains leeks.*

*Keywords: Fuzzy Logic, Arduino Mega2560 R3, Sugeno FIS, Mini Greenhouse, Leeks.*
