CHAPTER 5

CONCLUSION AND SUGGESTIONS

5.1. Conclusion

From the data analysis, the writer found that:

1. there are seventy-one informal words used in this movie. This result can be divided into two groups: nineteen informal words and fifty-two repetition data of informal words.

2. With regard to the types of word formation processes, the researcher found the most frequent type used in The Sleepover movie is clipping.

5.2 Suggestions

This study is a qualitative study on word formation processes in *The Sleepover* and discussed only four types, they are acronym, clipping, blending, and borrowing. Future research on word formation process can analyze more processes such as coinage, compounding, and other word formation processes.
