Judul Tugas Akhir: : NEW INDONESIA CAPITAL SENTIMENT  
ANALYSIS ON TWITTER USING SVM AND  
APPROACH WITH LEXICON METHOD

Diajukan oleh : Varada Dwi Cahya Putra

NIM : 17.K1.0047

Tanggal disetujui : 15 Juli 2022

Telah setuju oleh

Pembimbing : Y.b. Dwi Setianto S.T., M.Cs.

Penguji 1 : Yonathan Purbo Santosa S.Kom., M.Sc

Penguji 2 : Y.b. Dwi Setianto S.T., M.Cs.

Penguji 3 : Hironimus Leong S.Kom., M.Kom.

Penguji 4 : R. Setiawan Aji Nugroho S.T., MCompIT., Ph.D

Penguji 5 : Rosita Herawati S.T., M.I.T.

Penguji 6 : Yulianto Tejo Putranto S.T., M.T.

Ketua Program Studi : Rosita Herawati S.T., M.I.T.

Dekan : Dr. Bernardinus Harnadi S.T., M.T.

## DECLARATION OF AUTHORSHIP

I, the undersigned:

Name : VARADA DWI CAHYA PUTRA

ID : 17.K10047

declare that this work, titled "NEW INDONESIA CAPITAL SENTIMENT ANALYSIS ON TWITTER USING SVM AND APPROACH WITH LEXICON METHOD", and the work presented in it is my own. I confirm that:

1. This work was done wholly or mainly while in candidature for a research degree at Soegijapranata Catholic University
2. Where any part of this thesis has previously been submitted for a degree or any other qualification at this University or any other institution, this has been clearly stated.
3. Where I have consulted the published work of others, this is always clearly attributed.
4. Where I have quoted from the work of others, the source is always given.
5. Except for such quotations, this work is entirely my own work.
6. I have acknowledged all main sources of help.
7. Where the work is based on work done by myself jointly with others, I have made clear exactly what was done by others and what I have contributed myself.

## ACKNOWLEDGMENT

Praise God Almighty who has given His mercy and grace to the author so that the author can complete the thesis entitled “New Capital Sentiment Analysis On Twitter Using Svm And Approach With Lexicon Method”. The preparation of this thesis aims to fulfill the requirements for obtaining a Bachelor of Computer Science degree at Soegijapranata Catholic University Semarang.

In preparing for this thesis, many parties have provided motivation, advice, and support to researchers. In this valuable opportunity, the researcher would like to express his gratitude and appreciation to all parties. First, I would like to thank my beloved parents for their endless love, prayers, and support. Thanks also to Mr. Y.B Dwi Setianto, S.T., M.Cs as supervising lecturer who has been willing to direct, provide input on ideas and the author’s guidance from the beginning to the end of this final project report.

The author would like to thank friends and good friends who have supported, provided input, ideas, motivation and enthusiasm for the author to complete this final project. Thanks also to Aldila Ghadah Nabilah, A.Md. Kes. who have accompanied and entertained the author in completing this final project.

## ABSTRACT

*Social media is growing fast on the internet. One of the most popular social media is Twitter. Many topics are discussed on Twitter such as economic, politic, social, culture, and law. One of the hot topics discussed on Twitter is the issue of relocating Indonesia's capital city. However, there is controversy from supporters and opponents. They have different views. This issue leads to a phenomenon of debate on Twitter that actually shows a collective concern about the public discourse. Sentiment analysis is a process of extracting, understanding and processing unstructured data to get sentiment information which is found in an opinion sentence. Application of sentiment analysis using machine learning methods shows that there are several method that are often used in*

*In this study, the Support Vector Machine (SVM) method is proposed to be applied to classified sentiment tweets on the topic of Indonesia new capital on social media twitter. The classification technique is carried out into 3 classes, namely positive and negative, and neutral. Before the classification process the data is labeled by lexicon method approach to help increase accuracy. This research also use K-Fold Cross Validation for Evaluation and Validation the classification model.*

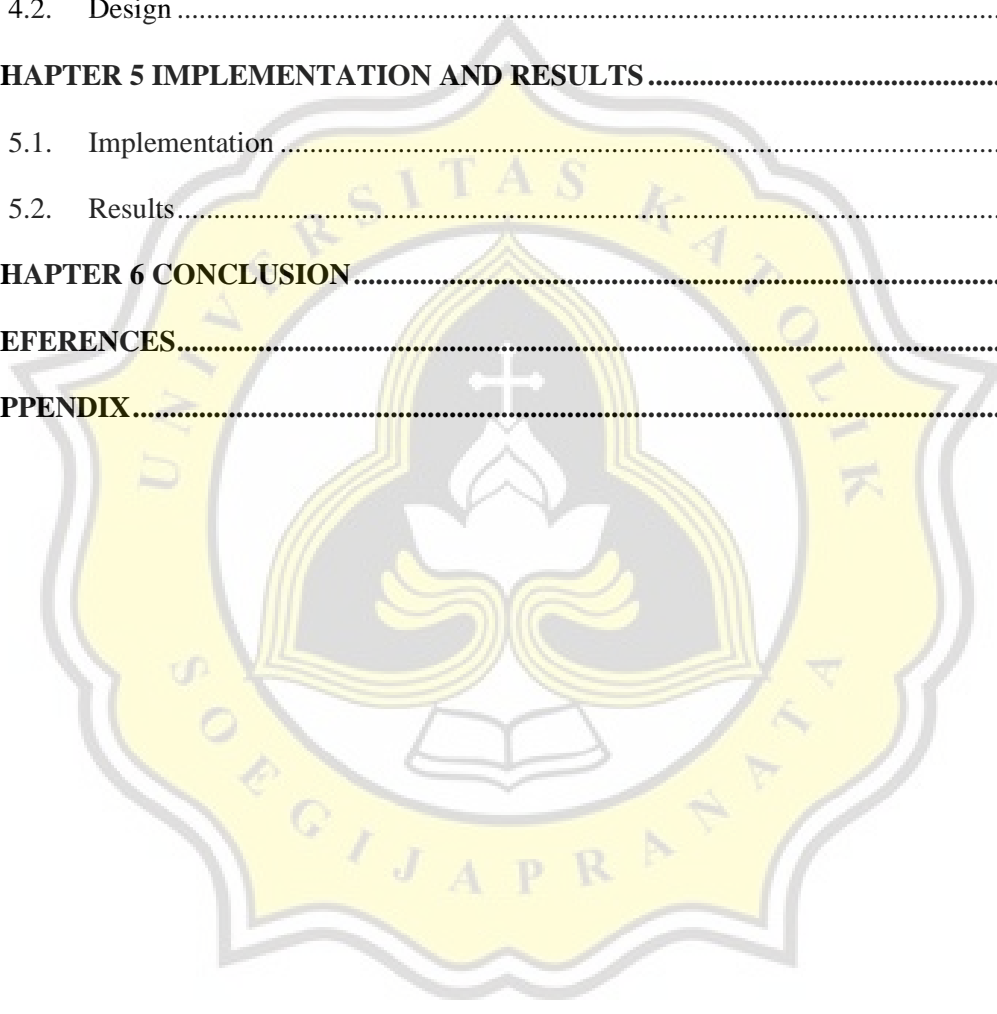

*Based on testing on the sentiment of Indonesia new capital city from social media twitter from 3000 tweets (1674 positive, 1005, and 321 neutral) using SVM with lexicon method approach obtained accuracy 86%. After evaluation dan validation using K-Fold Cross Validation the accuracy increase from 87% to 88,23%.*

*Keyword: SVM, Sentiment Analysis, Lexicon Based, K-Fold Cross Validation, Twitter*
