

ARCHITECTURE FINAL PROJECT

LVII Period, 8th semester , 2009-2010

PROGRAMMING

Research Centre for Zero Carbon Energy
Development in Indonesia

Design Accentuation :
Imposed pattern

Dominant issue
Canonical design

	PERPUSTAKAAN
NO. INV :	0460/SITAKI
TGL :	15/4/10
PARAF :	<i>A.</i>

Presented by :

Santa Noviyanti 06.11.0028

Advisor by :

Moediartianto , St. , MSc.

NIP 058.1.2000.235

Faculty of Architecture and Design, Department of Architecture

Soegijapranata Catholic University

March , 2010

APPROVAL SHEET

Date: April 26th 2010

ARCHITECTURE FINAL PROJECT

The 57th Period, Second Semester of 2009/2010 Academic Year

SOEGIJAPRANATA CATHOLIC UNIVERSITY

Project Title : Research Centre for Zero Carbon Energy
Development in Indonesia.

Design Accentuation : Imposed Pattern

Core Issue : Canonic Design

Submitted by : Santa Noviyanti 06.11.0028

Supervisor : Moediartianto, ST, M. Sc

Examiners : Ir. BPR. Gandhi, MSA
Ir. Robert Riyanto,
Dr. Ir. Krisprantono

Semarang, April 2010

Approved,

Head
Department of Architecture

Moediartianto, ST, MSc
NPP 058.1.2000.235

Dean
Faculty of Architecture and Design

Ir. Alb. Sidharta, MSA, IAI
NPP. 058.1.1987.022

Coordinator
Architecture Final Project

Ir. BPR. Gandhi, MSA
NIP 058.1.1986.015

APPROVAL SHEET

Date: April 26th 2010

PREFACE

The phenomenon of rotating blackout , be my starting point for this project main theme
The desire to gain unlimited energy is too passionate to be silenced
Booming of human population,
All living creature needs energy to life,
And mass emotions because they feel there is inequity in energy distribution.
It would be perfect if all the energy needed can be fulfilled indefinitely.
Peace and tranquility in the dream can be achieved.

But...

In middle of process, suddenly I realized.
That is just one point of view
How about the NATURE itself? who can understand her power, her potency
She cannot speak, Only human sense can feel it
A drop of water can tell a stories from whole sea
A wind blow can carry a legend through the time .
Is right to force nature ? To work for human needs
Trapped her into one area, is that possible ?

A new idea, a bright point has occurred
A unity between nature and human
Life together, grow together, and mutually beneficial.

Human only RECEIVED energy from nature
Then store it and used to full fill daily needs
Let the nature give different energy each day

Depend on her daily condition

No more forced

No more nature destruction

I plan this research centre,
Will become intermediary place
between Mother Nature
and human

Behind this paper, many people from different background was helped, compiler don't forget to render special thanks to:

1. Jesus Christ which has given health, mind and energy is so that writer can reach the finish programming.
2. My beloved parents, who always support me ,and always forced me to go to campus every morning.
3. Moediartianto, ST , MSc as advisor which have given a lot of time to read and correcting the paper both content and grammar also give a several supporting information which related with this project.
4. Ir. BPR Gandhi, MSA as coordinator lecturer .
5. Sustainable Energy Research Team (SERT) from University of Bath which have give a lot information about material energy and carbon and willing to give the data of their research.
6. Drs, Basar Antonius , chief of semarang navigation district , who was give a lot of help in collect data record about sea condition in semarang.
7. Drs. DARJONO, Sp.1, M. Mar. Eng., as mechanical engineering lecturer at BPLP semarang, which gave his knowledge about sea rules and many thing I can't list one by one.
6. Ir. D. Budi Setiadi, MT, lecturer at civil engineering , who was help me know and learn about foundation type in sand and sea area.
7. for Dr. Slamet Riyadi , lecturer at electro engineering, to willingly share his knowledge about solar panel and wind turbine.
8. All my best pals in studio PAA-57 which always have same feeling, both in desperate or joy. And thanks for waiting me every lunch time...^^....

And all the supporting people that cannot be mentioned one by one which have followed assist the writer in finishing this programming for architectural final project.

In final words, the writer hopes this paper will give the reader a little information about the importance of alternative energy, also all the supporting critics and suggestion are always needed to make better paper.

April 26th 2010

Santa Noviyanti

Writer

CONTENTS

Cover Sheet.....	i
Ratification Sheet.....	ii
Preface.....	iv
Contents.....	vi
Table and diagram list.....	x
Figure list.....	xii
Bibliography.....	xiv
Attachment.....	xvi
Chapter one : INTRODUCTION	
1.1. Background of the project.....	2
1.2. Goals and Objective of the Project.....	3
1.3. Scope of Programming.....	4
1.4. Method of Programming.....	5
1.4.1. Data Collection Method.....	6
1.4.2. Analysis Method.....	6
1.4.3. Programming Method.....	7
1.4.4. Design Method.....	8
1.5. Presentation on the Programming.....	8
Chapter two : GENERAL REVIEW	
2.1. General Approach of the Project.....	10
2.1.1. Overview.....	10
2.1.2. Project Background – Development – Trend.....	11
2.1.3. Goals.....	12
2.2. Specific Approach of the Project.....	13
2.2.1. Terminology.....	13
2.2.2. Activity.....	16
2.2.2.1. Principal.....	16
2.2.2.2. Activity.....	16
2.2.2.3. Facility.....	17

2.2.3. Design Specification.....	18
2.2.3.1. Architecture	18
2.2.3.2. Building Integrity	18
2.2.3.3. Environment	18
2.2.4. Urban Context.....	19
2.2.5. Study Comparison	
2.2.5.1. Centre for Alternative Technology.....	20
2.2.5.2. Masdar city.....	21
2.2.5.3. Sino-singapore Tianjin eco-city.....	23
2.2.3. Dominant issue.....	24
2.3. Conclusion, Restriction, and Assumption	
2.3.1. Conclusion.....	25
2.3.2. Restriction.....	25
2.3.2.1. Study boundaries.....	25
2.3.2.2. Standard.....	25
2.3.2.3. Objective.....	25
2.3.2.4. Future Prediction.....	26
2.3.3. Assumption.....	26
Chapter three : Architecture Program Approach	
3.1. Architecture Analysis	
3.1.1. Activity Study.....	28
3.1.1.1. Activity Grouping.....	28
3.1.1.2. Categorized.....	34
3.1.1.3. User-Activity Pattern-Characteristic.....	35
3.1.2. Facility Study.....	36
3.1.2.1. Space study.....	37
3.1.2.2. Special Space Study.....	44
3.1.2.3. Site Requirements.....	48
3.1.2.4. Building and site Requirement.....	49
3.1.2.5. Architectural Image.....	49

3.2. Building Integrity Analysis

3.2.1. Structure and Enclosure	50
3.2.2. Building Utility	
3.2.2.1. Communication system	54
3.2.2.2. Transportation system	54
3.2.2.3. Clean water	55
3.2.2.4. Fire Extinguishing system	56
3.2.2.5. Lighting rod system	57
3.2.2.6. Electricity	58
3.2.3. Technology	
3.2.3.1. Water technology	59
3.2.3.2. Electricity technology	64
3.2.3.3. Vertical Farming	70

3.3. Analysis of Environmental system

3.3.1. Locations Alternative	
3.3.1.1. BWK III sub-district	73
3.3.1.2. Jepara sub-district	74
3.3.2. Site Alternative	75

Chapter four : Architectural Programing

4.1. Programing Concept	79
4.2. Design goals, design determinant, design requirement	
4.2.1. Design Goals	79
4.2.2. Design Determinant	80
4.2.3. Design Requirement	80
4.2.3.1. Architecture	80
4.2.3.2. Building Integrity	81
4.3. Architecture Programming	
4.3.1. Program of Activities	81
4.3.2. Structure Programming	82
4.3.3. Utility system Programming	84
4.3.4. Site and Location Programming	85

Chapter five : Field study

5.1. Design Emphasis Theory.....	88
5.1.1. Interpretation and elaboration	88
5.1.2. Precedent.....	88
5.1.3. Project Implementation.....	90
5.2. Problem Theory.....	90
5.2.1. Interpretation and elaboration.....	90
5.2.2. Precedent.....	90
5.2.3. Project Implementation.....	95

TABLE AND DIAGRAM LIST

Table & diagram 1.1 : World energy consumption 2008, MMTOE.....	2
Table & diagram 1.2 : Methodology.....	3

Table & Diagram 2.1: World energy consumption.....	10
Table & Diagram 2.2 : Indonesia Energy Profile.....	10
Table & Diagram 2.3: Semarang city data.....	19
Table & Diagram 2.4 : CAT redundancy and inadequacy.....	20

Table & diagram 3.1: Activity grouping table.....	28
Table & diagram 3.2: Sector specification.....	29
Table & Diagram 3.3: Responsibility chart.....	29
Table & diagram 3.4: Scope of Research.....	30
Table & diagram 3.5: Research Chart.....	32
Table & diagram 3.6: Organization Chart.....	33
Table & diagram 3.7: User categorized.....	34
Table & diagram 3.8: user-activity pattern - characteristic.....	36
Table & diagram 3.9: main room requirements.....	36
Table & diagram 3.10: central office space study.....	41
Table & diagram 3.11: laundry room space study.....	41
Table & diagram 3.12: Infirmary space study.....	42
Table & diagram 3.13: CCTV-Restroom-Warehouse space study.....	42
Table & diagram 3.14: Canteen & multifunction hall space study.....	42
Table & diagram 3.15: 10 bedroom space study.....	43
Table & diagram 3.16: 4 bedroom space study.....	43
Table & diagram 3.17: Field station.....	43
Table & Diagram 3.18 : Agricultural laboratory and plant aero laboratory.....	44
Table & diagram 3.19 : water and rain laboratory.....	45
Table & diagram 3.20 : OCEAN and WAVE Laboratory , WIND Laboratory, SOLAR Laboratory.....	47
Table & diagram 3.21 : Building and site Recapitulation.....	49
Table & diagram 3.22: foundation type.....	50
Table & diagram 3.23: middle structure.....	52
Table & diagram 3.24: upper structure.....	53
Table & diagram 3.25: Transportation vertical and horizontal.....	54
Table & diagram 3.26 : clean water diagram.....	55

Table & diagram 3.27: Fire extinguishing process.....	56
Table & diagram 3.28 : Fire Detection-Extinguisher-and safety System.....	56
Table & diagram 3.29: Electricity diagram.....	58
Table & diagram 3.30 : Horizontal turbine component.....	65
Table & diagram 3.31 : Horizontal turbine.....	65
Table & diagram 3.32 : Vertical turbine type.....	66
Table & diagram 3.33 : Vertical turbine.....	66
Table & diagram 3.34 : Solar cell type.....	69
Table & diagram 3.35 : Grow lights.....	71
Table & diagram 3.36 : BWK III potency and constrain.....	73
Table & diagram 3.37 : jepara sub-district potency and constrain.....	74
Table & diagram 3.38 : Location selection criteria.....	74
Table & diagram 3.39 : Location comparative.....	74
Table & diagram 3.40 : SWOT analysis for maron beach.....	75
Table & diagram 3.41 : SWOT analysis for bandengan beach.....	76
Table & diagram 3.42 : site alternative criteria.....	77
Table & diagram 3.43 : site comparative.....	77

Table & diagram 4.1 : Activity Programming.....	81
Table & Diagram 4.2 : Hierarchy.....	82
Table & Diagram 4.3 : Lower structure.....	82
Table & Diagram 4.4 : Middle structure.....	83
Table & Diagram 4.5 : Upper structure.....	83
Table & diagram 4.6: fire extinguishing system.....	84

*I heard the brook lamenting like a widow mourning her dead child,
and i asked, "why do you weep, my pure brook?"*

*And the brook replied,
"because i am compelled to go to the city where Man contemns me ,
and makes of me a scavenger for his offal , pollutes my purity,
and turns my goodness fo filth"*

*Nature reach out to us with welcoming arms, and bids us to enjoy her beauty.
But we dread her silence and continue destroy her like ferocious wolf.*

Everything is nature bespeak the mother

The sun, the trees, song of the sea and hymn of the brooks.

The mother, the prototype of all existence, is the eternal spirit, full of beauty and love....

~ Khalil Gibran ~
