Prof. Maria M. Pachalska, MD., Ph.D
Editor-in-chief of **Acta Neuropsychologica**
Staff of **Acta Neuropsychologica**.

Prof. Gilles van Lujtelaar (the Donders Institute) and Ms. Shinta E. Wahyuningrum (SCU).

Dear prof. Pachalska,
thank you so much for your very prompt work.

First of all, it is almost done, however, there are two small minor revisions. Although minor, yet they are a bit disturbing since they are obviously not in line with other layouts. The said revisions should be made on page 448 and 449 (screenshot were attached on this email); please "erase the bullet number" on the front part of the explanation of the two tests (which still appear on page 448 and 449).

Secondly, hopefully once these two minor revisions have been made, we would like, again, ask for the DOI number of our article. The screenshot of the page (as indicated on your website) showed that there are still some articles that do not yet have the DOI, unfortunately, including our article.

By completing and handling these issues, we also hope that our article that is attached on your website page will be the latest one (as having been revised lately).

We would kindly request for these at your earliest convenience.

Thank you once again.
Looking forward to hearing good news from you.
