Review 2

Comments to Authors: Please highlight to the authors the strengths and weaknesses of their paper and justify your assessment. Please indicate any changes that should be made to the paper if it is accepted.

The strength of the paper is systematic research methodology that been used to validate the propose model. However, the content that relate to IT is quite minimal. Thus, the paper is focus more on **financial** management of the organization rather than IT.

It is suggested to add more descriptions or discussion on why IT support is important although it was found that the relationship is insignificant. The respondents may found it not important however, in view for support towards organization enhancement IT support should be considered to be important and critical.

In text citation need to be in accordance to IEEE standard by using numbering and bracket eg [1].
