Dear Ms. Maria Kineta:

Information about your paper #1570898540 ('Developing the Connection of Batik Lasem's E-Commerce Platform and Metaverse') for iSemantic 2023 was changed by Maria Kineta.

Bernardinus Harnadi added as author

No further action is required from you.

If you have already submitted your manuscript, you can change it at any time before the deadline, via web form upload: https://edas.info/uploadPaper.php?m=1570898540.

You can see all your submissions and their status at https://edas.info/index.php?c=30879, using the EDAS username .

From there, you can see the current status of the paper, whether a manuscript has been submitted and can edit the paper information.

You can directly view information about your paper at https://edas.info/showPaper.php?m=1570898540

Once you update your manuscript, you will receive another email confirmation.

Regards,
Dr. Eng. Farrikh Alzami, M.Kom
Chair of Technical Program Committee
International Seminar on Application for Technology of Information and Communication 2022

                                                                        12:15 PM

to Maria, Ridwan, me, Farrikh, Amalia, M, Nur, Helmy, Dian, Ratih, Aries

Dear Authors,

We are pleased to inform you that your paper has been "CONDITIONALLY ACCEPTED" by the Program Committee of 2023 International Seminar on Application for Technology of Information and Communication (iSemantic) for September 16-17, 2023, in Semarang, Indonesia.

Your paper requires content improvement and/or proofreading. We suggest you follow the reviewer's suggestion in order to refine your paper quality.

Please upload the part you revised according reviewer's suggestion to "REVISION NOTES"

The deadline for the revised manuscript submission is July 20, 2023, at 23:59 WIB. Please upload your manuscript as "REVISION MANUSCRIPT" on the EDAS system. Otherwise, your paper will be REJECTED.

We are looking forward to hearing from you. Thank you.

Regards,
Dr. Ir. RATIH SETYANINGRUM MT, IPM, ASEAN Eng
Chair of Technical Program Committee
International Seminar on Application for Technology of Information and Communication 2023
email: isemantic@lppm.dinus.ac.id
website: isemantic.dinus.ac.id/

below are the comments from reviewer:
======= Meta Review 1 =======

> *** Relevance: to ISEMANTIC 2023 topics
Relevant (3)

> *** Novelty: Originality
Significant (4)

> *** Contribution: to the Advanced Computational Technology area
Major (4)

> *** Presentation: Readability, English writing
Readable (3)

> *** Accept Score: Should this paper be accepted for ISEMANTIC 2023?
Normal Accept (7)

> *** Main Rejection Reason: What is the main reason you rejected this paper or consider it to be borderline?
No Reason (6)

> *** Comment to Author: e.g. Major reasons of your overall recommendation

Abstract : problems need to be equipped with data support why metaverse needs to be used in the batik industry
Introduction : the problems presented are not sharp and urgent and are not yet supported by quantitative data
Discussion : the figures and tables presented must be explained in the paper
Use references from the last 5 years

====== Meta Review 2 ======

> *** Relevance: to ISEMANTIC 2023 topics
Relevant (3)

> *** Novelty: Originality
Not bad (3)

> *** Contribution: to the Advanced Computational Technology area
Average (3)

> *** Presentation: Readability, English writing
Readable (3)

> *** Accept Score: Should this paper be accepted for ISEMANTIC 2023?
Neutral (4)

> *** Main Rejection Reason: What is the main reason you rejected this paper or

consider it to be borderline?
Poor or unbalanced presentation (2)

> *** Comment to Author: e.g. Major reasons of your overall recommendation

1. The selected topic is interesting and can be developed to increase economic value and increase technology implementation.
2. If the application has been created and implemented, the author can provide testing to determine application performance.
3. The author needs to add a test model from the user side.
4. E-Commerce Connection with Midtrans Payment
Gateway ----------- the information provided is unclear so what it looks like
5. The aims of the research and the results of the end of the research have not been conveyed in the abstract and introduction
6. Research stages such as flowcharts and series designs need to be explained in sub-chapter 3
7. The references used are not competent, so it is necessary to include the submer and the year of publication. Use references that are relevant to the latest research year because the metaverse is one of the latest technology models.

======= Meta Review 3 =======

> *** Relevance: to ISEMANTIC 2023 topics
Relevant (3)

> *** Novelty: Originality
Somewhat novel (2)

> *** Contribution: to the Advanced Computational Technology area
Average (3)

> *** Presentation: Readability, English writing
Readable (3)

> *** Accept Score: Should this paper be accepted for ISEMANTIC 2023?
Borderline Accept (5)

> *** Main Rejection Reason: What is the main reason you rejected this paper or consider it to be borderline?
No Reason (6)

> *** Comment to Author: e.g. Major reasons of your overall recommendation

1.   A good research paper has a clear statement of the problem the paper is addressing, the proposed solution(s), and the results achieved. It describes clearly what has been done before about the problem, and what is new. Novelty and contribution of

this paper need to be more specific. the implication of study result should be explained. compare to previous study also need to elaborate

2.   Section II "Method", doesn't it more proper if it's written ''Related Work''?. The related work section is an important part of a paper. An author often needs to help readers to understand the context of your research problem and compare your current work with previous works.

So, never include a theory that only explains the definitions of the terms you use. This is not a handout for delivering lecture material but rather a scientific writing presenting the results of your research.

3. The materials and methods section (needed here) is the heart of your scientific article because it shows the credibility and validity of your work. The materials and methods section is a section in the scientific article containing the experimental design of the study.

4. Experimental setup is not well described. Experimental results and their analysis are not sufficient. Additional results with rigorous analysis are necessary. Comparison with similar results from references is also important.

5. Authors should briefly describe the testing scenario before explaining the results because there are some different graphics presented there but the context are not yet explained

6. The conclusion is intended to help the reader understand why your research should matter to them after they have finished reading the paper. A conclusion is not merely a summary of your points or a re-statement of your research problem but a synthesis of key points.

7. Every figure and table should have a detailed explanation because not everyone can understand the pictures and tables that you present
