ABSTRACT

Computer Network is an operating system that consists of a number of computers and other network devices that work together to achieve a common goal or a network consisting of points are connected to one another, with or without cable. Each serves as a workstation nodes. One of the nodes as media services or servers, which are set certain functions of other nodes. Basically, a computer network technology itself is a blend of teknologi computer and communications technology as well.

Visualization can be done with HTML5.

FOREWORD

Finally I can finish my final project with title : Network Topology Schme Application. And thanks for all prayer and blessing:

- Jesus who gives me blessing to finish this project.
- My Family, Mother Father Sister and Brother who give me support and pray until finish this project.
- My Supervisor help me in finishing this project and given ideas and direction.
- My Lecturers that helps me in finding algorithm ,the data structure and to help me in making the title and data that will be used.
- All my friends from the Faculty of computer science.
