STATEMENT OF ORIGINALITY

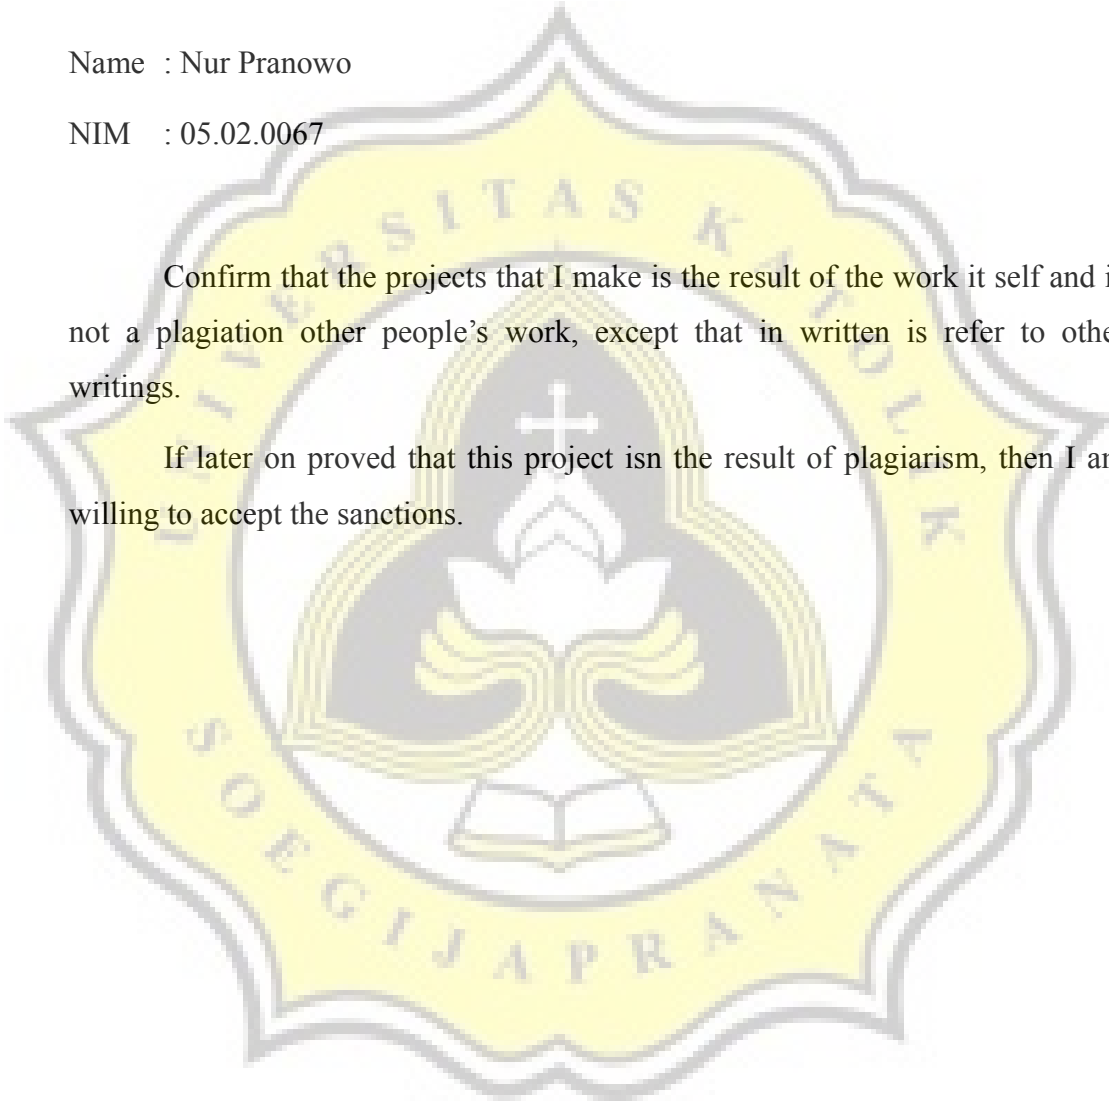

Here with, I

Name : Nur Pranowo

NIM : 05.02.0067

Confirm that the projects that I make is the result of the work it self and is not a plagiation other people's work, except that in written is refer to other writings.

If later on proved that this project isn the result of plagiarism, then I am willing to accept the sanctions.

ABSTRACT

Stack is one data structure that has a working system Last In First Out (LIFO), who last entered the first exit. Can be illustrated as a stack of books, when taking a book in the pile that it should be taken one by one from the book at the top of the stack of books. A stack can only be added and subtracted elements from only one side of the upper element or so-called Top Of Stack.

Queue is a database with additional data through one side only, namely the back (tail) and deletion of data only through the front side (head). Unlike the stack is LIFO, the queue is FIFO (First In First Out), ie the first data entry will come out first and last data entered will be out last.

Keyword : *stack, queue.*

FOREWORD

Praise and gratitude to God Almighty for His blessings and mercy so that the preparation of Project report titled “SIMULATION STACK AND QUEUE” can be resolved properly.

In the implementation of the Project until compiled report, the writer got a lot of help and support both morally and materially from various parties.

Therefore, to thank you and appreciation goes to :

1. God who always accompany and guide each step I take.
2. The beloved Dad dan Mom who always support me all the times.
3. My brother (Kristyanto, ST and Pudjo Handayani, ST) who always keep encourage and support whenever I need.
4. Mr Gregorius Hendita Artha Kusuma, S.Si.M.CS as well as Project Supervisor who has provided much so that writer can finish the project well.
5. All Lecturers of the Faculty of Computer Science, laboratory staff, and the TU that has helped up to the author can complete her education at Soegijapranata Catholic University, Semarang.
6. Ruddy, Edi, Yayas, Tupai, Iwan, Okma, Jo2n, Ridwan, Ryco, Gilang, Bagus, Temmy and other ikom friends that always accompany, entertain and support.

This Project report is far away from “perfect”, therefore the writer need the criticism and suggestions. Finally, the writer hope that this Project Report can give benefit for fellow student and everyone.
