ABSTRACT

In the development at this time, the use of the SMS (Short Message Service) only was not used to communicate between the user but often has been used to access and get information like information kesiswaan in the school, and information concerning the achievement to several certain agencies.

The SMS (Short Message Service) was a service that enabled the user to carry out communication with the other user by means of sending the message took the form of the text.

In the production of this Scientific Paper, was made by an application of the based signpost of the Gateway SMS and could be it was hoped made by an application as the turkey that was functioning as the signpost that could be accessed quickly, found it easy and efficient by all the circles only by sending the short message through Modem equipment.

Keyword: *SMS, Gateway SMS, Kalkun*
