Dear Bernardinus Harnadi

We are pleased to inform you that your paper:
Paper ID: 49
Title: Examining User Acceptance of MOOCs: The Role of Openness, Task Technology Fit, and Social Recognition

that submitted to the 2022 Seventh International Conference on Informatics and Computing has been ACCEPTED for an oral presentation. We cordially invite you to attend by presenting your paper in the ICIC2022.

It is mandatory to prepare the camera-ready paper as per the instructions listed on ICIC2022 website (https://icic-aptikom.org/2022/preparing-final-manuscript/) and your paper will not be published unless the following are done:
1.   Revise your paper(s) according to the reviewers' comments. The detailed review is listed in below of this email.
2.   The accepted similarity level is a maximum 25%, which you may check using Turnitin or other similar plagiarism checks.
3.   Format your camera-ready paper as per guidelines and follow the A4-IEEE format in doc/docx strictly
4.   Fill out the registration form that can be accessed from the website (https://icic-aptikom.org/2022/) and submit it by including the proof of your payment and proof of student status when it is relevant (https://bit.ly/ICIC22_reg). Please make sure to add some amount of registration based on your 3 digit paper id (For example: Regular Professional Participant Registration Fee: 2,000,000
Paper ID: xxx (ex. 006), then the Total Transfer is: 3,500,000 + 006 = 3,500,006 (See registration fee link to make sure how much you have to pay, https://icic-aptikom.org/2022/registration/)
5.   Send your camera-ready paper (in MS Word) also the presentation file to (https://bit.ly/ICIC22_cam)
6.   Electronic IEEE copyright form will be sent to the correspondent e-mail for each of your accepted paper.
7. Send your recording file of presentation max 100 mb (https://bit.ly/ICIC22_vid)

Please be reminded that the due date for early bird registration is 20th November 2022. At least one author has to register for the conference.

The conference will take place by Hybrid from December 8-9, 2022 in Bali. The schedule will be posted on the conference website as soon as it is completed.

All related conference materials can be found at https://icic-aptikom.org/. Please let us know if you have any registration questions.

With a warmest regard,
TPC Chair and Co-Chair

SCORE: 2 (accept)
----- TEXT:
Below are my comments on this paper:
- Please discuss the states of the art in the Introduction section. What gaps did you find in the literature?

- Why did you need to integrate ECM with openness, task technology fit, and social recognition factors? Please discuss the need for integrating such factors.

- The hypotheses development is very weak. You just cited previous studies. You also need to discuss the context (MOOC) when providing the arguments of a hypothesis.

- The methodology should be improved. Methodology should be discussed in detail to ensure reproducibility of your research. Please discuss data collection procedure (how long, how did you distribute your questionnaire, etc), instrument development, and data analysis method.

- Please discuss the implications of this study, both for practice and theory.

----------- Overall evaluation -----------
SCORE: 1 (weak accept)
----- TEXT:
This study measures user acceptance with several theories of Openness, TTF, and Social Recognition.

1. In the introduction, the problem must be written explicitly. What have other researchers done for these three theories? Need data support and references.

2. Redraw the proposed conceptual model proportionally.

3. Redraw the table according to the IEEE Template instructions. (Don't copy paste)

4. The results of hypothesis testing can use images from SmartPLS analysis.

5. In the discussion section, what are the theoretical implications, and what are the practical implications? The impact of the theory can be related to similar research that combines the three ideas. Does this research support previous research?

6. Attach the operational definition of the variable or instrument.
