### Research Elements (optional)

This journal encourages you to share research objects - including your raw data, methods, protocols, software, hardware and more – which support your original research article in a Research Elements journal. Research Elements are open access, multidisciplinary, peer-reviewed journals which make the objects associated with your research more discoverable, trustworthy and promote replicability and reproducibility. As open access journals, there may be an Article Publishing Charge if your paper is accepted for publication. Find out more about the Research Elements journals at [https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec\\_em\\_research\\_elements\\_email](https://www.elsevier.com/authors/tools-and-resources/research-elements-journals?dgcid=ec_em_research_elements_email).

Computers in Human Behavior Reports values your contribution and I look forward to receiving your revised manuscript.

Editor and Reviewer Comments:

### Reviewer's Responses to Questions

Note: In order to effectively convey your recommendations for improvement to the author(s), and help editors make well-informed and efficient decisions, we ask you to answer the following specific questions about the manuscript and provide additional suggestions where appropriate.

1. Are the objectives and the rationale of the study clearly stated?

Please provide suggestions to the author(s) on how to improve the clarity of the objectives and rationale of the study. Please number each suggestion so that author(s) can more easily respond.

Reviewer #1: 1. Why are the two theories are applied to investigate behavioral differences for the MOOCs and e-learning? Usually if we compare, we should use the same theoretical framework.

2. In the introduction, the authors stated the aim of the study is to understand behavioral differences in the acceptance of MOOCs and e-learning. What is the theoretical contribution for doing this? What can we do after knowing the differences?

3. One of the research questions is "what factors influence...."? , obviously it is not align with the title.

Reviewer #2: 1. Authors should explore current issues that lies within educators/teachers/tutors and the current condition in education - which should link with contribution made in the conclusion section.

2. Research background - What about practices worldwide and chosen location? (please refer comments made for methodology).

2. If applicable, is the application/theory/method/study reported in sufficient detail to allow for its replicability and/or reproducibility?

Please provide suggestions to the author(s) on how to improve the replicability/reproducibility of their study. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Yes  No  N/A

Provide further comments here:

1. Please explain separately, why the TAM and ECM are chosen and then combined.

2. Also, there are many variables examined in the technology acceptance literature, why the extended variables in this study are chosen? Rationales were needed.

Reviewer #2: Mark as appropriate with an X:

Yes  No  N/A

Provide further comments here:

Authors should explain theory utilised for the research - why chose TAM and ECM?; how does the theory relevant to the highlighted issues and objectives of the research?

3. If applicable, are statistical analyses, controls, sampling mechanism, and statistical reporting (e.g., P-values, CIs, effect sizes) appropriate and well described?

Please clearly indicate if the manuscript requires additional peer review by a statistician. Kindly provide suggestions to the author(s) on how to improve the statistical analyses, controls, sampling mechanism, or statistical reporting. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Yes  No  N/A

Provide further comments here:

The method section is too short and lacks specification. Please refer to published SSCI journal articles or Scopus journal articles for the details of the method section.

Reviewer #2: Mark as appropriate with an X:

Yes  No  N/A

Provide further comments here:

1. Methodology explanation is not thorough enough. Please revised according to steps taken.
2. Location of the research is not clear - which country?; characteristic of chosen institutions?

4. Could the manuscript benefit from additional tables or figures, or from improving or removing (some of the) existing ones?

Please provide specific suggestions for improvements, removals, or additions of figures or tables. Please number each suggestion so that author(s) can more easily respond.

Reviewer #1: Tables and figures are acceptable, but please revise tables to align with the APA format.

Reviewer #2: No.

5. If applicable, are the interpretation of results and study conclusions supported by the data?

Please provide suggestions (if needed) to the author(s) on how to improve, tone down, or expand the study interpretations/conclusions. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Mark as appropriate with an X:

Yes  No  N/A

Provide further comments here:

Reviewer #2: Mark as appropriate with an X:

Yes  No  N/A

Provide further comments here:

Please refer comments made for the research objectives and rationale.

6. Have the authors clearly emphasized the strengths of their study/theory/methods/argument?

Please provide suggestions to the author(s) on how to better emphasize the strengths of their study. Please number each suggestion so that the author(s) can more easily respond.

Reviewer #1: Strengths (theoretical and practical contribution) , limitations of the study and suggestions for further study need to be explicitly elaborated.

Reviewer #2: Authors should strengthen up the write-up on issues, theory utilised, methods and conclusion.

7. Have the authors clearly stated the limitations of their study/theory/methods/argument?

Please list the limitations that the author(s) need to add or emphasize. Please number each limitation so that author(s) can more easily respond.

Reviewer #1: No.

Reviewer #2: Need revision according to comments made on research objectives and rationale, theory utilised and methodology.

8. Does the manuscript structure, flow or writing need improving (e.g., the addition of subheadings, shortening of text, reorganization of sections, or moving details from one section to another)?

Please provide suggestions to the author(s) on how to improve the manuscript structure and flow. Please number each suggestion so that author(s) can more easily respond.

Reviewer #1: In the introduction section, I suggest the authors use subtitles such as "problem statement", "research gap", "aim of the study" to guide readers' thinking. Using subtitles will make the manuscript easy to follow.

The method section needs to be improved.

Reviewer #2: No.

9. Could the manuscript benefit from language editing?

Reviewer #1: No

Reviewer #2: Yes

Reviewer #1: This field is optional. If you have any additional suggestions beyond those relevant to the questions above, please number and list them here.
